number of open museums has stagnated change in estimated number open museums since 1960** across all areas, regardless of deprivation index. However, the rate of growth prior to this stagnation is lower in more deprived areas. 200 10 200 196920201969202019692020196920201969202020 *The Index of Multiple Deprivation (IMD) measures the relative deprivation of geographic areas in the UK, aggregating different dimensions (income. employment, education, health, crime, housing, and living environment). The index ranges from 1 (most % deprived) to 10 (least deprived).
